Screws

▲ Due to varying cabinet dimensions among end users, adjust the product height by lifting it on-site during installation to match the actual internal height of the cabinet before fitting the product into place.

由于终端用户所使用的机柜尺寸各不相同，请在安装过程中通过现场提升产品高度的方式进行调整，以使其与机柜实际内部高度相匹配，然后再将产品安装到位。

step 1

Prior to installation after product delivery, remove all transit fixing screws first.

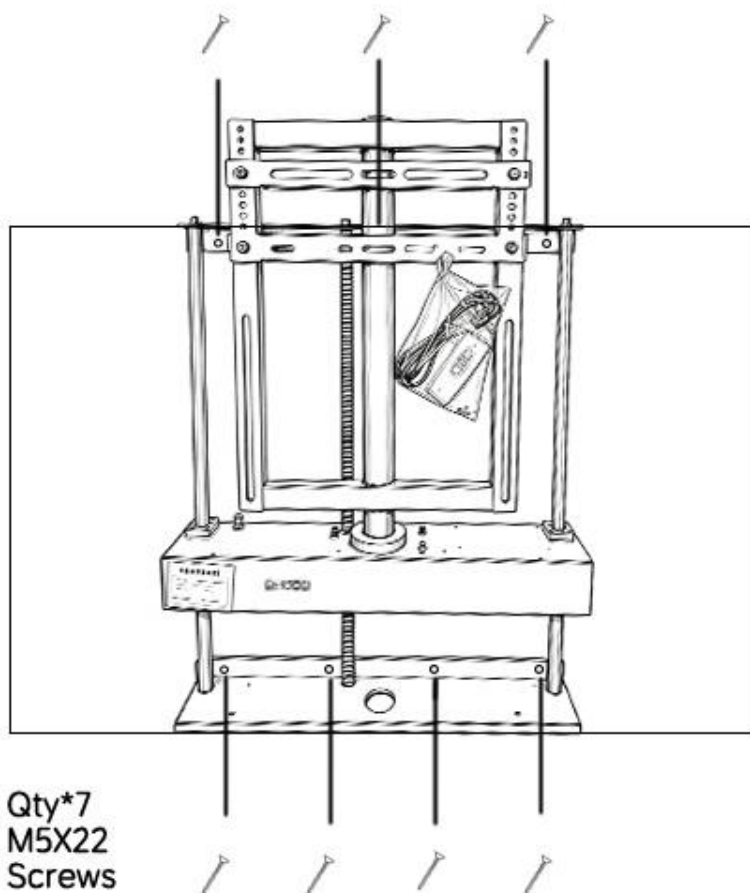

产品交付后安装前，请先移除所有运输固定螺丝。

step 2

Insert the wiring when installing the product into the cabinet and lift the unit to expose the mounting screw holes for easy assembly.

在将产品安装到柜体时插入布线，并抬起设备以露出安装螺丝孔，以便于组装。

Screws

step 3

在左右两侧安装金属板支撑面板。(根据实际安装高度要求安装支撑面板。)

Install sheet metal support panels on left and right sides.
(Install the support panels according to actual installation height requirements.)

step 4

Place the cabinet board in position.

将柜板放置到位。
